

Bold's Table

by Christophe de la Fontaine

The Bold series is our most iconic new feature. A dining table whose appearance is a collage of various architectural references: built from two massive cork side panels, graphically enhanced with linear connections and feet, and completed with a powder coated aluminum table top. While maintaining the cork and wood dialogue of the Bold chair, Bold's table finds its character in a much slender form, and simpler expression. The sophisticated mix of material, surface treatment and colour allow a great variety of appearance. Available in two lengths: 210 and 280cm.
